www.plumpton.ac.uk

This summer we want you to join us on Instagram and demonstrate your enthusiasm, curiosity, commitment, and creativity. Over the next eight weeks we will be setting a task every seven days through Instagram and we would like you to post your responses.

What's required?

1. You **must** create a new Instagram account, one that is **solely dedicated** to your Horticulture course and college life.

The name you choose should be **easily identifiable** as a Plumpton Horticulture student and your account bio must include '**Plumpton College Horticulture Student**'

We **strongly recommend** that you make your account private and only accept 'follow' requests from other Plumpton students, Plumpton affiliated Instagram accounts and other Horticulture enthusiasts.

2. Your new account should be dedicated to your course, please **do not** use this as a personal account - it should only be used for Horticulture related content and opinions. Think of how you present yourself on social media as this can (*and has in the past*) impact on opportunities in the future.
3. You must follow the Horticulture course Instagram account so we are able to set the weekly tasks and monitor your progress by 'tagging us' in your post.
4. Be respectful. Only use the DM function (Direct messaging) to get know your new classmates. Be positive, professional but most importantly... **Nice!**

Task 1

So... for your first task we want you to get out exploring as many outdoor spaces as possible. Take as many photos of inspirational gardens, design and landscaping features or interesting plants and post your favourites on your new account and 'tag' us in your post.

*We expect that as well as the weekly tasks set that you post at least once a week about something Horticulture related. **All other tasks set must be completed before you start your course.***

Good Luck from the Horticulture dept.
